

WALLTOPIA

ADVENTURE TRAIL

THE CONCEPT

Exciting adventures await you in Adventure Trail's labyrinth of nets

Walltopia's Adventure Trails is an elevated playground that allows participants to experience the thrill of heights without the need for a harness.

Its challenging tunnels of nets and obstacles are a great way to diversify entertainment centers and deliver unique emotions in a safe environment.

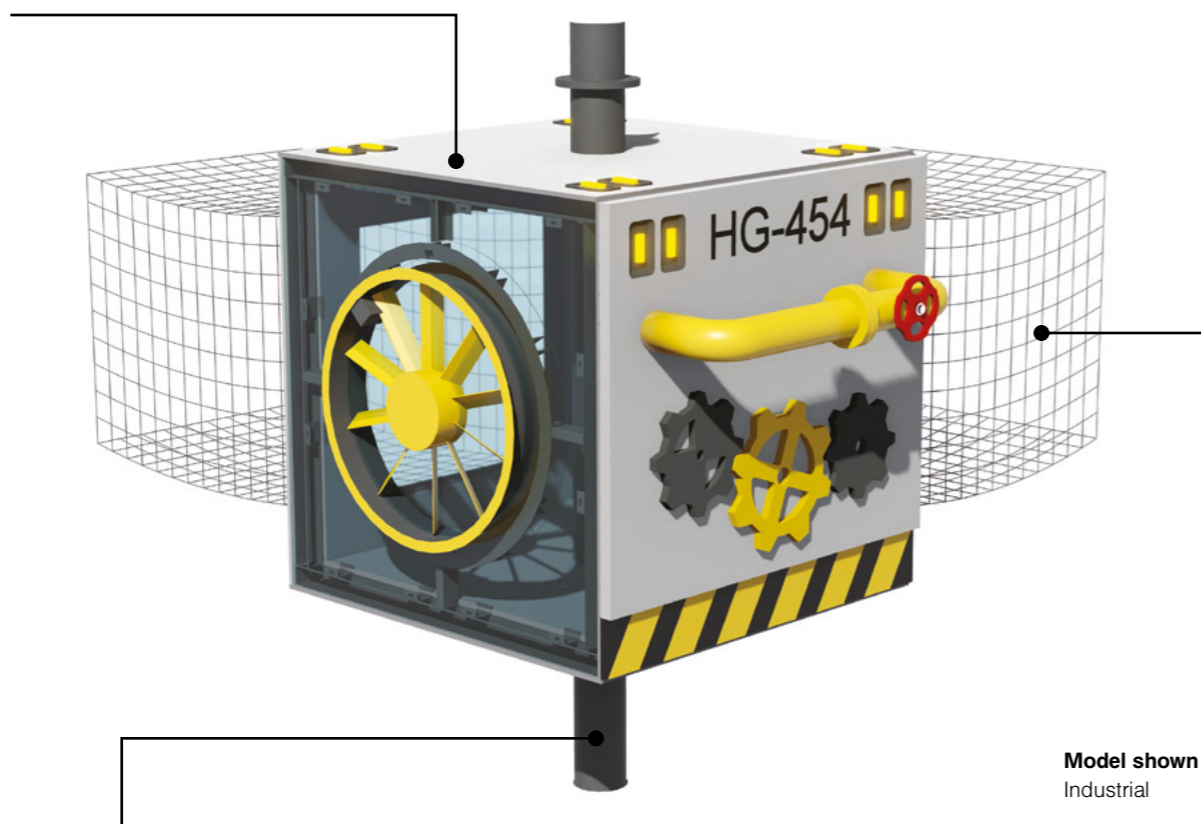

THE STRUCTURE

Houses

The inner structure of the houses can be comprised of the following materials.

- **Plywood** – used in indoor facilities, plywood is a durable material which can also be made fire retardant if requested (B fire retardant rating).
- **GRP (Fiberglass)** – suitable for outdoor facilities, this material is usually used for complex structures and can be produced to meet fire retardant demands (B fire retardant rating).
- **HPL (High Pressure Laminate)** – suitable for the outdoors, HPL is used to bring life to the structure. It has multiple uses such facade, flooring or decoration.
- **HDPE (High Density Polyethylene)** – harder and stronger than polyethylene, HDPE is used for outdoor Adventure trail structures.

Support structure

Adventure Trail's structure can be self-standing, suspended from the ceiling or combined with another attraction.

To ensure the durability and aesthetic finish of the construction, we offer three sheathing options.

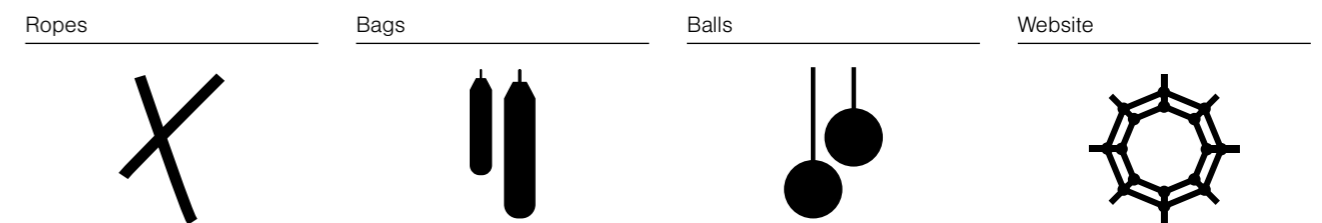

- **Painted only structure** – suitable if you intend to locate the Adventure Trail indoors.
- **Hot dip galvanized only structure** - zinc sheathing, protects the structure against corrosion from outdoor weather conditions.
- **Duplex system** – painted & hot-dip galvanized, this system ensures both protection and an appealing facade for the Adventure Trail structure

Nets & obstacles

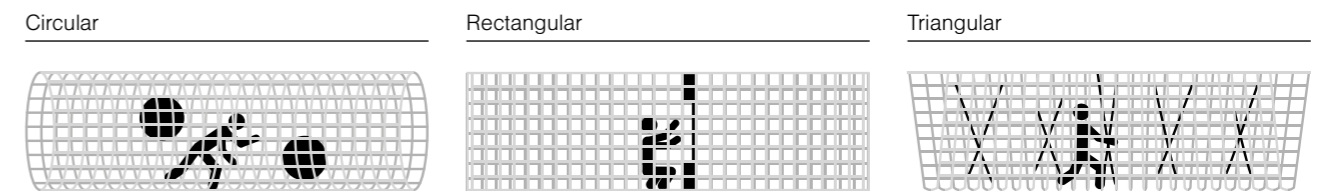

Adventure Trail's nets are made out of two types of ropes:

- **Combination ropes** – these highly resistant ropes are used for the base nets. They have a high strength polyamide fiber core and 6 galvanised steel strands
- **Polyester ropes** – used for all the other ropes which constitute the net.

Inside these nets, multiple obstacles can be placed to challenge visitors and enhance their experience. They are easy to replace and rearrange. Here are some examples:

Finally, Adventure Trail's nets are offered in 3 different shapes—triangular, rectangular and circular. The combination of obstacles and net shape allows for the creation of truly unique experiences for the participants and ensure the uniqueness of each Adventure Trail we deliver.

WALLTOPIA

OVER 1800 PROJECTS
IN 78 COUNTRIES ON 6 CONTINENTS

Founded in Bulgaria in 1998, Walltopia is a world leader in the Climbing and Adventure & Leisure industries. The company started out with the purpose of designing and manufacturing the most advanced climbing facilities in the world.

Our passion for science, technology and our obsession with excellence and safety, made us a leader and top expert in the Climbing and Active Entertainment industries.

We pride ourselves with our highly complex projects that always deliver expected results – starting with the design, moving on to the installation and finally – the certification.

Today we have the largest portfolio of classic and novel attractions that combine fun and entertainment with healthy doses of adrenaline for people of all ages. With sales offices in the USA, Canada, China, UAE, Asia Pacific, a Head office in Sofia, Bulgaria and four production plants employing more than 600 people, to this day, we have produced over 1800 projects in 78 countries and on 6 continents.

Our products are installed across adventure parks, amusement parks, shopping malls, gyms, recreational areas, ski resorts, schools & universities, hotels and more.
