WALLTOPIA

COMPANY **OVERVIEW**

WALLTOPIA

WHO WE ARE

Walltopia is the world's leading climbing wall manufacturer.

Walltopia is the meeting point of the passion for climbing of two friends with business know-how. Starting in a small garage in a small Bulgarian city back in 1998, Ivaylo Penchev and Metin Musov let go of their climbing athlete goals to build a company that would soon change the whole indoor climbing industry.

Fast-forward 21 years later, today Walltopia employs more than 900 people and has successfully completed over 1800 projects around the globe. Walltopia has sales offices in the USA, Canada, Germany, China, UAE, Russia, Asia Pacific. The Head office is located in Sofia, Bulgaria.

Stepping on our experience in the climbing industry, in 2012 we embarked on a new adventure. Driven by our passion for action sports and a desire to transform physical activity into amusing and purposeful play that is suitable and entertaining for everyone, with no need for specific sport preparation and minimum equipment required for the participants, we started a new product line – active entertainment.

It consists of different products sharing the same goal: encourage people to get active and spend more time with friends and family in a meaningful way:

- **Fun Walls** - interactive climbing walls
- **Ropes Course** - aerial adventure courses
- **Walltopia Caves** - artificial caving
- **Rollglider** - aerial ride that combines the feel of zipline and rollercoaster
- **Ninja Course** - obstacle courses inspired by the famous TV show
- **Adventure Hub** - all of the above combined with other amusement attractions into one massive entertainment facility.

WALLTOPIA

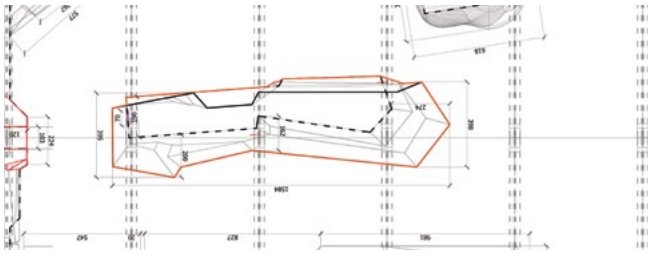

IN DETAILS

ARCHITECTURE & DESIGN DEPARTMENT

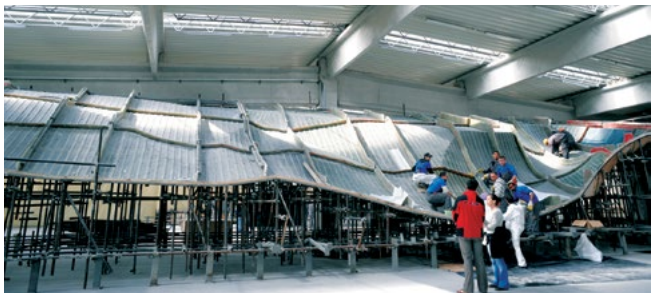

A team of highly skilled architects and 3D artists is ready to tackle any design challenge to meet the customers' expectations in terms of expected capacity, budget, target group and operation model. From the smallest climbing wall to a massive gym, from a single attraction to a big adventure hub our design team will find the best solution for the layout and appearance of every project.

ENGINEERING DEPARTMENT

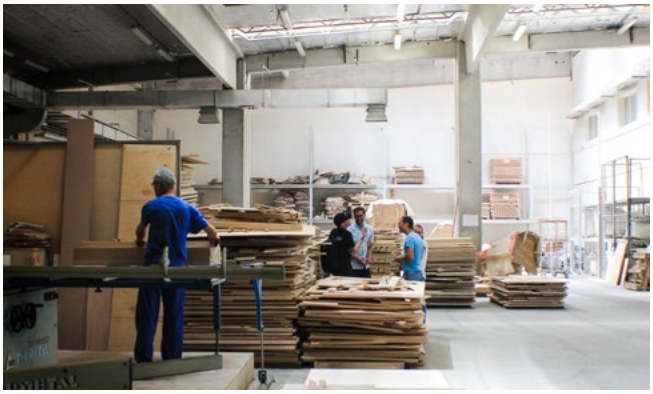

A team of 48 structural engineers, drafters, CNC programmers and mechanical engineers calculates precisely the structures and components of all climbing walls and active entertainment attractions to make sure what was designed will be produced and installed exactly the same way in accordance to the local regulations of every project venue.

PRODUCTION FACILITIES

More than 26 000 sq.m / 279 861 sq.ft distributed between four production plants with over 500 employees: workers & supporting staff facilitate the manufacturing of steel construction, plywood and fiberglass panels and components, electronics and additionals. Innovation, development and improvement of the production process and therefore our products and services is our core value and mission.

Iron shop:

- Capacity of 2200 tons metal per year
- Team of 150 people (incl. welders and locksmiths)

Plywood panels production:

- Capacity of 1 076 400 sq.ft /100 000 sq.m per year
- Team of 32 people
- Two 5-Axis CNC Machines
- Latest texturing & painting equipment;

Fiberglass panels production:

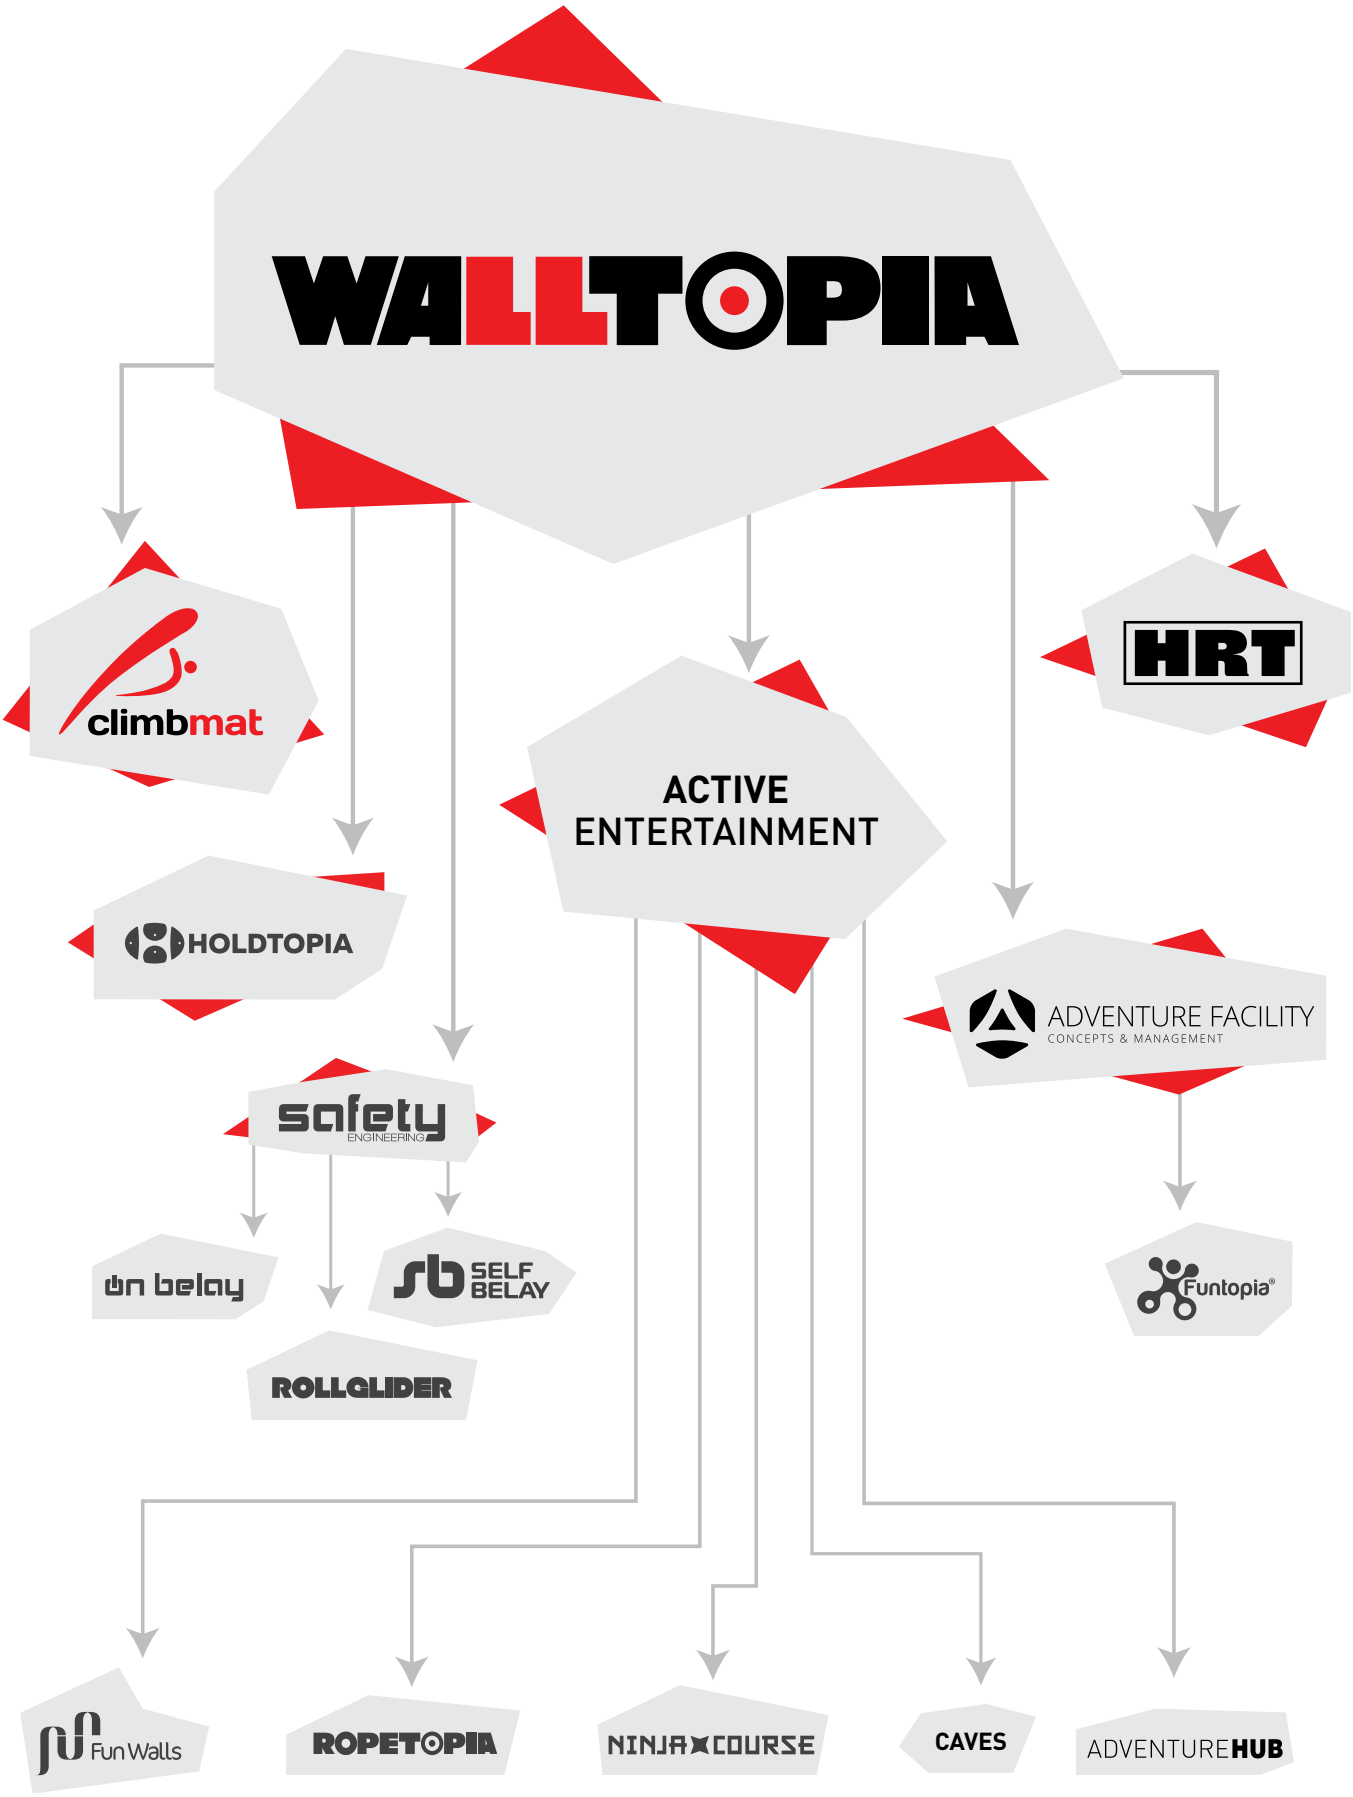

- Capacity of 64 580 sq.ft / 6 000 sq.m per year
- Team of 50 people
- Highly qualified employees, including sculptors and art workers.

PROJECT MANAGEMENT & INSTALLATION DEPARTMENT

A team of devoted project managers and over 120 technicians, all full time employed by Walltopia, travel the world to install climbing walls and attractions in a professional manner. All our technicians pass Walltopia Academy - specialized trainings for welding, work at heights, operation of mobile working platform equipment and other specific skills needed for the niche industry we operate in. A civil engineer based at our HQ office serves as a team leader of each technician crew. Maintenance and inspection team makes sure our products operate corectly over time.
