

WALLTOPIA

NATURAL WOOD

Natural wood has always been around in interior design. People enjoy it in their homes as it adds a cozy feel to the living space. In the same time quality wood elements bring elegance and sophistication to the interior.

When it comes to climbing walls, the natural wood look was the standard more than 15 years ago, simply because the coating techniques we have today were underdeveloped and that was all the industry was capable of. When technology allowed us to make bright, colorful walls with improved texture, natural wood was abandoned, only to live as a nostalgic memory of the past.

However, in recent times the wood look is making a return and it's becoming hugely popular again. Whether used by itself or as a signature element of a multi-color design, it always brings warmth and makes climbers feel at home. At Walltopia we have developed technology to offer a variety of colors, shades and textures in order to provide climbing wall design that suits the most sophisticated taste.

NATURAL WOOD DESIGN OPTIONS

Get cozy and sophisticated

Walltopia natural plywood comes in three shades: light, medium and dark to suit any color scheme. Combined with solid color panels or used by themselves, the wood panels create a homey atmosphere. The rubber resistant coating makes it easy for the operators to maintain a good looking wall over time.

Friction: to be or not to be

Walltopia natural wood panels can be textured or glossy. The texture comes at exactly the same amount of friction just like all Walltopia walls. Our production technology allows for the grain to be transparent so that it does not compromise the aesthetics or the climbing experience. Create a dual-textured wall combining sleek and textured panels for a creative rotesetting canvas.

Versatile veneers

Natural wood veneers add another dimension to the climbing wall desing. Our designers work with a large selection of veneers, ask your contact person for the current availabilities and pricing. A popular approach is the combination of a light natural plywood with dark American wallnut veneer.

WALLTOPIA

OVER 2000 PROJECTS

IN 78 COUNTRIES ON 6 CONTINENTS

It all started back in 1998 in a garage in a small town in Bulgaria where two friends combined their passion for climbing with their business know-how. Ivaylo Penchev and Metin Musov gave up on their professional climbing careers to build a company that would soon change the whole indoor climbing industry.

Today Walltopia is the world's leading climbing wall manufacturer with over 2000 projects successfully completed around the globe. Our sales offices in the USA, Canada, China, UAE, Asia Pacific, our Head office in Sofia, Bulgaria, and our four production plants employ more than 500 people.

LET'S TALK ABOUT YOUR PROJECT
