

WALLTOPIA

COLORS

STANDARD SOLID COLORS

Dream in color.

One of the most important features of a climbing wall is its color scheme, as it affects the overall atmosphere in the gym. Walltopia uses a standard palette of 20 colors allowing for numerous color combinations, clever composition and creative interior design.

The color you envision is not on the palette? You can add a number of different colors outside our standard range at an extra charge and subject to longer production times. Consult your sales contact and designer for the options.

CUSTOM COLOR SPLIT TECHNOLOGY

Apply color in creative shape.

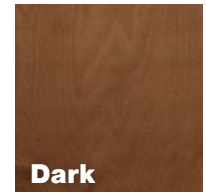

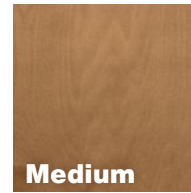

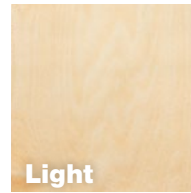

Our Custom Color Split technology allows for creative forms in the climbing gym design no matter the complexity of the shapes on every single panel. Our automated production technology allows for unlimited design opportunities, perfect consistency on every single panel and superb execution.

NATURAL WOOD

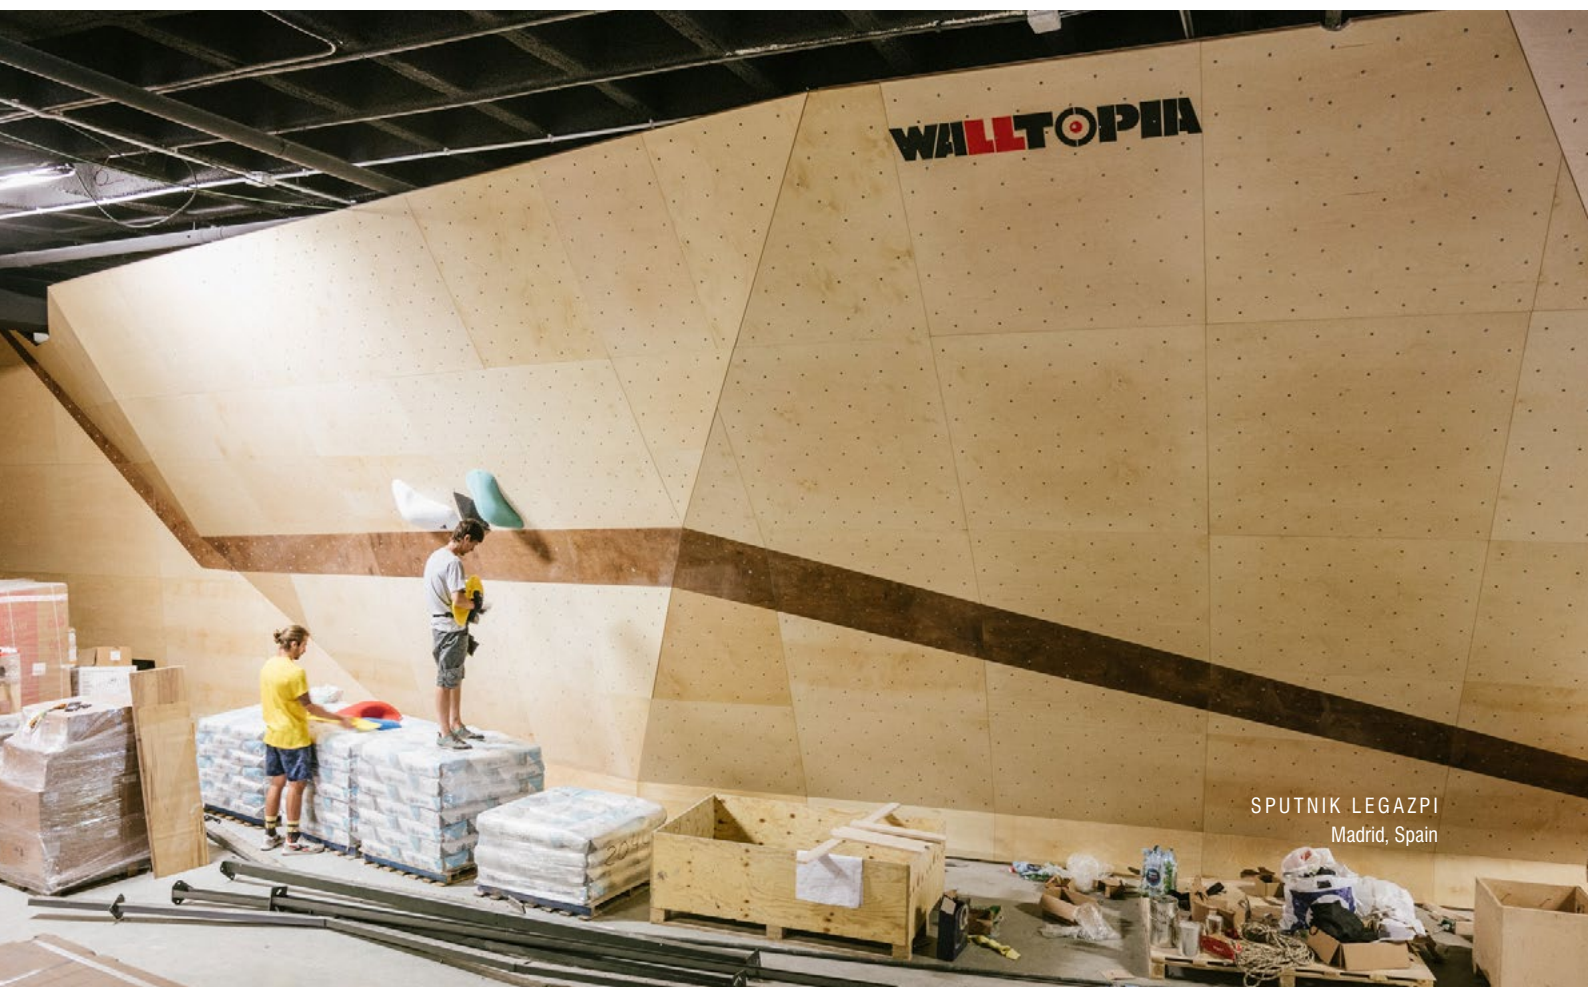

Get cozy and sophisticated

Walltopia natural wood comes in three shades: light, medium and dark to suit any color scheme. Combined with solid color panels or used by themselves, the wood panels create a homey atmosphere. The rubber resistant coating makes it easy for the operators to maintain a good looking wall over time.

Friction: to be or not to be

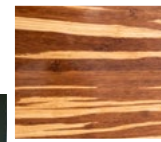

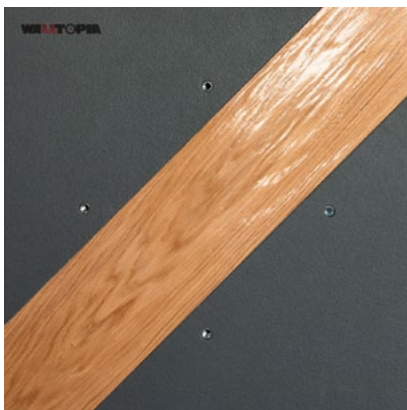

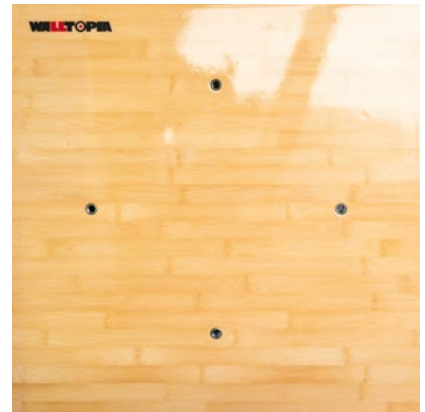

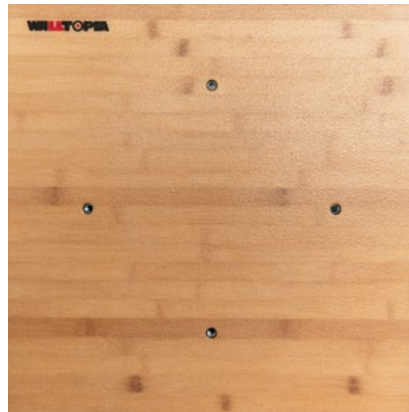

Walltopia natural wood panels can be textured or glossy. The texture comes at exactly the same amount of friction just like all Walltopia walls. Our production technology allows for the grain to be transparent so that it does not compromise the aesthetics or the climbing experience. Create a *dual-textured wall* combining sleek and textured panels for a creative route-setting canvas.

NATURAL WOOD

Experiment with veneer

Natural wood veneers add another dimension to the climbing wall design. Our designers work with a large selection of veneers, ask your contact person for the current availabilities and pricing.

Tiger Bamboo

Bamboo

NATURAL STONE

I Wanna Rock*

The natural stone panels are a great signature element in the design of a climbing gym. They combine well with solid color or natural wood panels creating a cozy earthy atmosphere. Extracted from real rock, the climbing wall panels with stone veneer not only look but also feel like real rock because they are...well, natural stone. Walltopia real rock comes in a variety of textures and shades, ask your representative for the current availabilities.

ROCKTOPIA COLORS

Rock out*

Rocktopia is our way of going back to the roots of rock climbing. These are walls that resemble real rocks. To ensure the natural feel, the molds that shape the fiberglass panels have been cast from real rocks at our home iconic crags. The surface can be high or low relief depending on the desired level of difficulty. The neat placement of the holds is achieved by our flat underhold technology that eliminates the risk of hold breakage. Although there are no restrictions in the color options, we recommend the realistic rock look – the different hues of limestone, granite or sandstone.

WALLTOPIA

OVER 2000 PROJECTS IN 80+ COUNTRIES ON 6 CONTINENTS

Founded in Bulgaria in 1998, Walltopia is a world leader in the Climbing and Adventure & Leisure industries. The company started with the purpose of designing and manufacturing the most advanced climbing facilities in the world.

Our passion for science, technology and our obsession with excellence and safety, made us a leader and top expert in the Climbing and Active Entertainment industries.

We pride ourselves with our highly complex projects that always deliver expected results – starting with the design, moving on to the installation and finally – the certification.

Today we have the largest portfolio of classic and novel attractions that combine fun and entertainment with healthy doses of adrenaline for people of all ages. With sales offices in the USA, China and head office in Sofia, Bulgaria, and four production plants employing more than 500 people, to this day, we have produced over 2000 projects in 80+ countries and on 6 continents.

Our products are installed across sports centers, theme and amusement parks, shopping malls, gyms, recreational areas, resorts, schools and universities, museums and zoos, hotels, and more.
