

WALLTOPIA ZIPLINES

THE CONCEPT

Flexible zipline solutions, built to last, for indoor and outdoor facilities

Walltopia Ziplines are a breathtaking attraction for thrill-seekers of all ages and experience levels.

Suitable for both urban and natural settings, they have low operating costs and thus represent the perfect addition to any facility looking to boost their revenue.

Additionally, multiple Ziplines can be built in parallel in order to let visitors share the ride — transforming this already emblematic experience into a social one.

MODELS

Stand-alone Ziplines

As a stand-alone, Walltopia Ziplines can be built everywhere. They can exploit a natural sloping ground or, through a tower, create an artificial incline. Towers help build up excitement as visitors reach for the top and also have the added-benefit of offering a viewpoint

Add-on Ziplines

Walltopia Ziplines as an add-on offer a secondary exit from ropes courses & other adventure attractions to visitors. The last rush of adrenaline acts as a "grand finale" and leaves a long-lasting impression on the visitors' minds. We recommend charging it as an extra on top of the price of the ticket.

COMPONENTS

Starting platform

The layout of the platform is designed to provide easy and safe operation for a maximum throughput.

Harnesses

The harnesses provided (Basic Duo - Camp) prevents users from detaching without the help of the operating personnel.

Trolley

Walltopia Ziplines are usually fitted with Headrush Technologies' "Lightspeed impact zip line trolley".

Other less common trolley are also compatible but their uses are reserved to specific cases such as very long or fast lines.

COMPONENTS

Line

Walltopia Ziplines use the highest quality steel rope for each and every project. All lines also feature a redundant safety system, further increasing participants' safety.

Brakes

Steady decrease in the velocity is ensured by the provided braking device — Headrush ZipStop. It exists in different versions depending on the arrival velocity of the participant and is an industry-leading braking systems for ziplines.

The placement of the brake is calculated according to the exact parameters of your ride.

Landing platform

The landing area of each project is designed to ensure a smooth stop to the ride. The landing platform's geometry and placement is tailored to the specifics of each project.

According to our operational directions, participants are met and guided by an operator to ensure a safe exit out of the platform.

REFERENCE PROJECTS

BAO SON PARADISE

WALLTOPIA

OVER 2000 PROJECTS
IN 80+ COUNTRIES ON 6 CONTINENTS

Founded in Bulgaria in 1998, Walltopia is a world leader in the Climbing and Adventure & Leisure industries. The company started out with the purpose of designing and manufacturing the most advanced climbing facilities in the world.

Our passion for science, technology and our obsession with excellence and safety, made us a leader and top expert in the Climbing and Active Entertainment industries.

We pride ourselves with our highly complex projects that always deliver expected results – starting with the design, moving on to the installation and finally – the certification.

Today we have the largest portfolio of classic and novel attractions that combine fun and entertainment with healthy doses of adrenaline for people of all ages. With sales offices in the USA, China and head office in Sofia, Bulgaria, and four production plants employing more than 500 people, to this day, we have produced over 2000 projects in 80+ countries and on 6 continents.

Our products are installed across adventure parks, amusement parks, shopping malls, gyms, recreational areas, ski resorts, schools and universities, hotels, and more.
